

Favorite animal

Where to start: In an informative piece of writing, kids name what they're writing about and give some information, facts, or details (e.g. Dinosaurs lived on Earth a long time ago. Some dinosaurs were bigger than people are today...). Start with a conversation about an animal they've learned about, either at school or on their own.

Prompt: Draw your favorite animal and write three facts about that animal.

How to go deeper: Choose an animal you don't know about. Can you gather three new facts about it by researching online? (Use the back of this page to write.)
